

Conflict Free Zone Sourcing Policy

SAFC Hitech is aware of allegations that profits from illegal mining of metals in the Democratic Republic of Congo (DRC) may contribute to perpetration of human rights violations in the Eastern Region of the DRC. As a responsible supplier SAFC Hitech endeavours to comply with the Electronic Industry Code of Conduct by only sourcing from socially and environmentally aware vendors. It is our expectation that compliance is confirmed through the supply chain to mine of origin for materials containing tantalum, tungsten, cobalt, tin and gold.

SAFC Hitech has implemented systems whereby suppliers are expected to confirm any of the above metals used in materials supplied to us are not from conflict zones.

Our customers can be assured that SAFC Hitech has taken all reasonable measures to ensure supplied products based on any of the above metals do not have mines of origin in the DRC.
